# The Corridor Technologies Ltd.

*Innovative Software. Reliable Hardware. Seamless IT Solutions.*

# Company Overview

**The Corridor Technologies Ltd.** is a full-spectrum ICT company offering **custom software development**, **AI Agents & automation**, **professional IT support**, **hardware supplies**, **licensed software solutions**, and **proprietary digital innovation tools**. Our experienced team provides end-to-end digital transformation across sectors including government, healthcare, education, hospitality, real estate, and finance.

We go beyond conventional IT by integrating **intelligent automation & agents**, reliable infrastructure, and strategic consultancy — making us the go-to technology partner for both enterprises and SMEs.

We are also proud creators of **Timeless Branch** and **Space Optimizer** — game-changing platforms that power modern digital experiences and organizational efficiency.

# Proprietary Software: Timeless Branch

Timeless Branch brings digital experiences to life using smart QR code solutions.

1. **Digital Catalogs**
   Product catalogs to WhatsApp via digital QR.
2. **Digital Business Cards**
   Share contacts with a tap or scan, editable.
3. **Digital Memories**
   Weather-proof QR codes on tombstones for tributes.
4. **Hotel & Audio/Video Menus**
   Real-time editable menus, personalized messages.
5. **PDF to Flipbook & WiFi**
   Instant interactive booklets and WiFi connectivity.
6. **Feedback & Analytics**
   Custom forms, real-time client feedback, scan analytics.

# Space Optimizer – Smart Storage Room Management

### Visual Layouts

Interactive mapping of strong rooms, shelves, cabinets, rows, and columns

### File Management

Assign, retrieve, and track files with digital mapping

### Digital Copies

Attach digital documents to each physical file

### Search & Filter

Find files using custom tags, keywords, owner, or category

Space Optimizer is a digital filing system designed for institutions managing large volumes of physical files. Additional features include: Expandable Files to add documents to existing records, Analytics & Insights to monitor storage usage with visual dashboards, and Activity Logs to review access history for files and users. It's ideal for Government agencies, hospitals, law firms, archives, and institutions with long-term physical storage.
